

It is suggested that the Examiner's use of the words "[I]n addition" at the beginning of the last sentence might be erroneously interpreted to be referring to a combination. Patent owner observes that none of the references disclose skids in the region of the transferring drum or in the space between a transferring drum which feeds overhead and the feeding opening of the separation rotors.

Kindly place these comments in the reexamination file in accordance with Office practice.

Respectfully submitted,

Robert E. Muir
